### JSB Staff Pick of the Week

With more time at home, we've asked our staff to pick some of their favorite Japanese movies and books. Here's the staff pick of the week:

<u>N no</u> <u>tameni</u> (2014)

Four college students end

up at the scene of a murder. One of them, Nishizaki, confesses the crime and gets arrested at the scene. Ten years later, a former police officer decides to find out the truth behind the murder.

"□□□ (*baeru*)" comes from "□□□

□ (*Insuta-bae*)" which means to stand out on Instagram. It was made into a verb by adding "-ru" and now is used to refer to something that looks so stylish that you want to take a picture and then post to share with everyone. "□□□" was selected as the No. 1 New Japanese Word for 2018 by the major Japanese dictionary publisher, Sanseido.

The Japanese often create verbs by adding "-ru" to nouns. For example, "□□□ panikuru□" means to panic; "□□□ guguru□," to search on Google; "□□□ amazoru□," to shop on Amazon; and "□□ (tapiru)," to drink Tapioca drinks. It is interesting to look at the Buzzwords of the Year to see how the Japanese language is constantly evolving.

Send us your  $\Box \Box \Box (baeru)$  picture or video from Japan to be used in our Virtual Trip to Japan we're creating! See details below.

Did you know Sapporo

is where lager beer production started in Japan? During the Meiji Period, Japan started to adopt western culture, including beer. The government established the Kaitakushi Beer Brewery, the predecessor of Sapporo Beer, in Sapporo in 1876 because Hokkaido already had wild hops, and its climate was perfect for barley growing and low temperature fermentation. <u>The US and Gas Market Challenge</u> <u>Facing Japanese Buisness:</u> <u>Covid 19 x Factor</u>

### Thursday, June 4th 5:00 to 6:00 PM (Starts at 6:00 PM EST)

COVID-19 has created new opportunities to instantly interact with people thousands of miles away, however cultural and physical distinctions can also create new challenges. Access to a reliable internet connection, a society's acceptance of remote work, and even the size of a home can all play a role in how employees and their families adjust to life during COVID-19.

Companies in the information technology and telecommunications industries are at the heart of this dilemma – how to provide important services around the world, while also responding to rapidly-changing requirements, customers' concerns, and unique country environments. In this webinar, we will discuss how Japanese and American firms are using their expertise to address current societal needs, how working from home and returning to work are different in Japan and the U.S., and how COVID-19 is impacting our immediate future.

#### Tuesday, June 9th from 9:00 AM

The fracking revolution that began a decade ago has drastically altered the geography and economics of global energy supplies. This revolution has led to a renaissance in oil and gas/LNG investment that few could have foreseen. The COVID-19 crisis has presented another severe—and unpredictable disruption that has led to an unprecedented drop in the global oil and gas/LNG market. A drop this precipitous and sudden is unprecedented in the history of the energy industry worldwide. Join Japan-America Society of Washington DC for a moderated discussion with American and Japanese experts on energy business and governance.
